Cimarron LED

Maximum Performance Superior Value

Mast Arm Fitter

Vandal Shield

The new Cimarron LED features a solid die-cast housing assembly which maintains the same architectural profile as its predecessor. The Cimarron LED housing features unique vertical fins along the side walls to dissipate heat as well as channel rain water away from the top housing, keeping the fixture cool and clean for years. For versatility the Cimarron LED uses the same #2 drill pattern so it can be easily retrofitted to existing Cimarron installations. It can also be mounted to poles or arms with the optional mast arm fitter. For extra protection, a vandal shield option is available.

Available in multiple lumen output packages with IES type II, III, IV and V distributions:

- 90 LEDs at 310w, producing over 22,000 lumens
- 90 LEDs at 210w, producing 15,000 lumens
- 60 LEDs at 140w, producing 10,000 lumens
- 30 LEDs at 70w, producing 5,000 lumens
